

# NATIONAL HIV/AIDS STRATEGY 2016 PROGRESS REPORT

## 5 things you should know

### Made national progress on 9 key indicators

- Decline in new HIV diagnoses
- Drop in HIV death rate
- Increases in knowledge of status, linkage to care, and viral suppression
- Decrease in disparities in HIV diagnoses for black females
- Increase in viral suppression among youth, people who inject drugs, and transgender women

### Established 3 new developmental indicators

- Increase viral suppression in transgender women
- Increase use of PrEP
- Reduce HIV stigma

### Completed 76% and initiated 22% of 91 Federal actions planned for 2016

- 48 more actions to be completed by 2018
- 28 additional actions to be completed by 2020
- Federal Action Plan encourages collaboration across all parts of the federal government to drive progress

### Implementing the Strategy in communities across the nation

- Innovative programs to strengthen and accelerate the HIV response in more than 10 cities/states
- Tailored efforts in communities to meet the needs of key populations
- Diverse partnerships to have an even greater impact in HIV testing and care

### Addressing challenges to meet our 2020 goals

#### We still have work to do to reduce disparities for:

- Gay and bisexual men
- Southern United States
- Homeless persons living with HIV

#### The Strategy is our roadmap. We must not let up our efforts to:

- Increase HIV testing and linkage to care, retention in care, viral suppression, and PrEP uptake
- Reduce stigma
