<td>BLM</td>
<td>1004-AE26</td>
<td>Hydraulic Fracturing</td>
<td>The rule would require oil and gas operators to disclose hydraulic fracturing fluids that would be used in their operations and to submit to the BLM, well integrity information prior to well stimulation (e.g., hydraulic fracturing).</td>
<td>Proposed rule Spring 2012</td>
<td>Not yet determined</td>
<td>Tribal consultation scheduled for Mid-January 2012. Regulation text complete. Drafting preamble and supporting documents.</td>
</tr>
<tr>
<td>BLM</td>
<td>1004-AE24</td>
<td>Solar/Wind Competitive Process</td>
<td>The BLM determined that a comprehensive, long-term wind and solar energy development program on public lands requires a robust, regulatory framework that establishes a competitive process for awarding right-of-way leases under current FLPMA authority. The ANPR seeks public input on this program.</td>
<td>ANPRM published in the Federal Register on December 29, 2011.</td>
<td>Not yet determined</td>
<td>Public comment period closes February 27, 2012.</td>
</tr>

<tbody>
<tr>
<td>BLM</td>
<td>1004-AE20</td>
<td>Onshore Royalty Reform</td>
<td>The BLM proposes to amend its oil and gas regulations to set a royalty rate of 18 3/4 percent for oil production on new Federal competitive oil and gas leases issued in lease sales held on or after the effective date of the final rule. The royalty rate for gas production would remain unchanged at 12 1/2 percent. This rule would allow the Secretary to review and revise royalty rates for new competitive leases as appropriate.</td>
<td>Proposed rule scheduled for April 2012</td>
<td>The benefit-cost and economic impact analysis indicates that both the Federal Government and the states would receive increased revenues from the higher proposed royalty rate.</td>
<td>Regulatory text has been drafted and is going through internal clearance.</td>
</tr>
<tr>
<td>Agency/Sub-Agency</td>

<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>----------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>BLM</td>
<td>1004-AD93</td>
<td>Coal Regulations</td>
<td>The primary purpose is to implement provisions of the Energy Policy Act of 2005. Other purposes: update regulations on Logical Mining Units, establish 3 new fees, and define the royalty rate (12½% versus 8% for underground mining) for coal recovered using hybrid coal mining technology.</td>
<td>Proposed rule scheduled to publish by April of 2012</td>
<td>Three new fees would help the BLM recover the cost of implementing the Energy Policy Act of 2005. The fees (estimated total of $2,640 per year) are unlikely to adversely affect the coal industry. Defining the royalty rate for coal recovered using hybrid coal mining technology would have a minimal financial effect.</td>
<td>This proposed rule has been drafted and is going through internal DOI clearance process.</td>
</tr>
<tr>
<td>BLM</td>
<td>1004-AE25</td>
<td>Land Classification Regulations</td>
<td>Removal of obsolete land classification regulations and consolidation of updated regulations with the existing planning regulations.</td>
<td>Proposed rule is scheduled to publish by November of 2012</td>
<td>Anticipated cost savings to the Government of $27,000 to $40,500 annually, due to the elimination of redundant procedures.</td>
<td>Drafting proposed rule and supporting documents.</td>

<tr>
<td>Assistant Secretary Indian Affairs (ASIA)</td>
<td>1076-AE73</td>
<td>Leasing Regulations</td>
<td>This proposed rule would replace the current subpart addressing non-agricultural leases on Indian land with subparts more specifically addressing residential leasing, business leasing, and leasing for wind and solar development on Indian lands.</td>
<td>Proposed rule is scheduled to be complete by the end of February 2012</td>
<td>This rule is expected to result in cost savings to Indian Tribes of approximately $28 million from the removal of the appraisal requirement. Although difficult to quantify, it will also increase opportunities and remove barriers for Indian development of wind and solar energy production.</td>
<td>Tribal consultations planned for 01/2012.</td>
</tr>

| NPS               | 1024-AD30              | Commercial Filming and Similar Projects and Still Photography Activities | The regulation implements Public Law 106-206 and establishes a common procedure for the issuance of commercial filming and still photography permits by certain agencies of the Department of the Interior | Final rule scheduled to publish March 2012 | Final rule will improve efficiency in the application process for commercial filming companies applying to DOI agencies for a permit.  
Final rule will lead to unified location fee schedule used by both DOI agencies and the U.S. Forest Service and will provide the commercial filming industry with predictable fee for their activities. | The final rule has been drafted and is going through internal DOI clearance process.  
The draft location fee schedule, which will be published at the same time as the final regulation has been surnamed by the U.S. Forest Service. Is being reviewed and surnamed by DOI agencies. |

<td>FWS</td>
<td>1018-AX44</td>
<td>Revising the Critical Habitat Boundary Description Method</td>
<td>Together with NMFS, we will revise our critical habitat description method in our joint regulations. This will not affect the regulations' substance but will increase efficiency, save taxpayers' money, and make the critical habitat designation process more user-friendly to the public. We will continue to publish critical habitat maps, but will make optional any textual description of boundary-coordinate lists in our regulations. We will provide the public with easier-to-use tools that clarify which areas are covered by a designation. These tools will be available on the Internet and at the applicable FWS or NMFS Office.</td>
<td>Final rule scheduled to publish in March 2012</td>
<td>The Service estimates that this regulatory improvement will save $327,852 per fiscal year in Federal Register printing costs and $63,890 per fiscal year for CFR printing costs. The total savings would be $391,742 per fiscal year.</td>
<td>The final rule has been drafted and is going through internal DOI clearance process.</td>

<td>FWS</td>
<td>1018-AY29</td>
<td>Expanding Incentives for Voluntary Conservation Actions under the Endangered Species Act</td>
<td>The Service will issue an advance notice of proposed rulemaking (ANPRM) that invites public comments and ideas on how the Service can create incentives for individuals to engage in voluntary conservation actions and provide assurances that the benefits of their conservation actions can offset the adverse effects of activities carried out either before or after listing.</td>
<td>This ANPRM is scheduled to publish in February 2012</td>
<td>By better understanding the perspectives of the regulated community, the Service believes it can more successfully develop regulations for addressing how the benefits of pre-listing conservation actions can count toward the mitigation or other requirements needed to secure approval for an action carried out after listing. Such regulations would reduce the transaction costs incurred by the regulated community (e.g., States, Tribes, local governments, industry, private landowners) associated with ESA compliance</td>
<td>The ANPRM has been drafted and is going through internal DOI clearance process.</td>

<tr>
<td>FWS</td>
<td>1018-AX86</td>
<td>Implementing Changes to the Regulations for Designating Critical Habitat</td>
<td>This proposed rule would amend existing regulations governing the designation of critical habitat under section 4 of the Endangered Species Act. A number of factors, including litigation and the Services’ experience over the years in interpreting and applying the statutory definition of critical habitat, have highlighted the need to clarify or revise the current regulations. This is a joint rule between the Fish and Wildlife Service and the National Marine Fisheries Service (NOAA, Commerce).</td>
<td>This proposed rule is scheduled to publish in February 2012</td>
<td>Increased clarity, consistency, and certainty associated with how the Services designate critical habitat would reduce the transaction costs incurred by the regulated community (e.g., Federal agencies, States, Tribes, local governments, industry, private landowners).</td>
<td>The proposed rule has been drafted and is going through internal DOI clearance process.</td>

<tr>
<td>FWS</td>
<td>1018-AX87</td>
<td>Policy for the Designation of Critical Habitat Under Section 4 of the Endangered Species Act</td>
<td>The proposed rule would amend the existing regulations governing section 7 consultation under the Endangered Species Act to revise the definition of &quot;destruction or adverse modification&quot; of critical habitat. The current regulatory definition has been invalidated by the courts for being inconsistent with the language of the Endangered Species Act. We therefore need to propose a revised definition and seek public review and comment. This is a joint rulemaking with the National Marine Fisheries Service (NOAA, Commerce).</td>
<td>The proposed rule is scheduled to publish February 2012</td>
<td>Increased clarity, consistency, and certainty associated with how the Services define “destruction or adverse modification” of critical habitat would reduce the transaction costs incurred by Federal agencies and non-federal applicants and reduce the potential for further litigation that can have financial impacts on the Services as well as Federal and non-federal applicants.</td>
<td>The proposed rule has been drafted and is going through internal DOI clearance process.</td>

<td>1018-AX85</td>
<td>ESA Section 7 Consultation Regulations; Incidental Take Statements</td>
<td>Court decisions rendered over the last decade regarding the adequacy of incidental take statements have prompted us, along with the National Marine Fisheries Service (NOAA, Commerce), to consider clarifying our regulations concerning two aspects of issuance of incidental take statements during section 7 consultation under the Endangered Species Act. The proposed regulatory changes would specifically address the use of surrogates to express the limit of exempted take and how to determine when deferral of an incidental take exemption is appropriate.</td>
<td>The proposed rule is scheduled to publish in February 2012</td>
<td>Increased clarity, consistency, and certainty associated with how the Services issue incidental take statements during interagency consultation would reduce the transaction costs incurred by Federal agencies and non-federal applicants and reduce the potential for further litigation that can have financial impacts on the Services as well as Federal and non-federal applicants</td>
<td>The proposed rule has been drafted and is going through internal DOI clearance process.</td>
