

11"

# let's make a BO HO HO

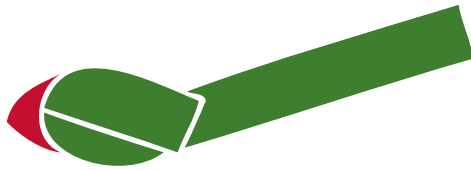

9"

## SUPPLIES

- (6) 11 x 1 inch strips
- (8) 9 x 1 inch strips
- (2) 4 x 1 inch strip
- Scissors
- Double-sided tape or glue stick

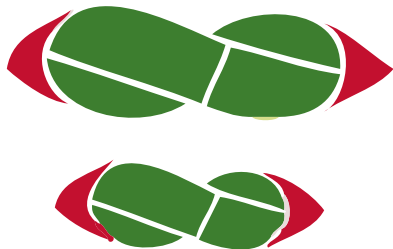

## STEP 1

Start your bow by duplexing the strips of paper together. Then fold the 11-inch strips in half, with your preferred color on the outside. Then, hold the middle of the strip with your left hand, and grab the top of the strip with your right hand. Fold the top portion of the strip down and around (creating a pointed loop), and secure it to the middle of the strip with glue or tape.

## STEP 2

Flip the strip around and repeat Step 1 on the opposite side, making sure that the loops create a figure 8 (and that the strips line up evenly). Repeat this process for all of the 11-inch and 9-inch strips.

## STEP 3

Begin assembling your bow by creating the base with the larger, 11-inch sections. Make sure that each section is evenly spaced apart, and adhere to one another in the center with glue or tape.

## STEP 4

Add the smaller, 9-inch sections to the base to build up the middle of the bow.

## STEP 5

Create a small loop with the 4-inch strip for the center of the bow. Adhere the loop to the center of the bow to complete. Happy gift wrapping and Bo Ho Ho!
