

Agency	Awardee Name	State(s) Served	Award Amount	Project Description
USDA	Spacenet, Inc.	AK, HI	\$7,530,000	This approximately \$8 million award, will allow Spacenet, Inc. to offer satellite broadband service to rural residential subscribers in Alaska and Hawaii. Approximately 12,550 people stand to benefit. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
USDA	North Alabama Electric Cooperative	AL	\$19,100,909	This approximately \$19 million award, will allow North Alabama Electric Cooperative to offer a Fiber-To-The-Premises (FTTP) broadband service network to areas of Jackson and Marshall Counties in northeast Alabama. Approximately 20,120 people stand to benefit, as do roughly 1,442 businesses and 53 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
DOC	JKM Consulting	AL	\$6,269,197	This approximately \$6.3 million award will allow JKM Consulting to offer affordable middle-mile broadband service in the rural, economically distressed east-central Alabama region. The project plans to directly connect more than 40 community institutions to broadband. As many as 126,000 people stand to benefit as do 3,700 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Troy Cablevision, Inc	AL	\$26,068,284	This approximately \$26.1 million award will allow Troy Cablevision to offer affordable middle-mile broadband service in southeast Alabama. The project plans to directly connect as many as 140 community institutions to broadband. As many as 127,200 people stand to benefit as do 3,600 businesses. In addition to the more than approximately 145 jobs Troy Cablevision estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Trillion Communications Corporation	AL	\$59,258,545	This approximately \$59.3 million award, with nearly \$27 million in matching contributions, will allow Trillion Communications to offer affordable middle-mile broadband service in south-central Alabama. The project plans to directly connect as many as 400 community institutions to broadband. As many as 172,800 people stand to benefit as do 3,000 businesses. In addition to the more than 550 jobs Trillion Communications estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.

DOC	Boat People Sos, Inc.	AL	\$461,539	This approximately \$460,000 award will allow Boat People SOS to provide skills development opportunities for low-income residents and those with limited English proficiency in areas of Alabama devastated by Hurricane Katrina and the subsequent major oil spill. The project will provide skills training, education, and support and increase broadband computer access by creating three new public computer centers with 57 new computer workstations. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Appalachian Valley Fiber Network	AL, GA	\$21,286,914	This nearly \$21.3 million award will allow Appalachian Valley Fiber Network to offer affordable middle-mile broadband service in Georgia and Alabama. The project plans to directly connect 185 community institutions to broadband. As many as 345,000 people stand to benefit as do 8,300 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	University of Arkansas System	AR	\$102,131,393	This approximately \$102 million award will allow the University of Arkansas System to offer affordable middle-mile broadband service in the state. The project intends to enhance two major community-serving networks already in existence with a focus on improving healthcare and education capabilities. The project plans to directly connect approximately 475 community institutions to broadband. As many as 1.32 million people stand to benefit as do 61,000 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	California Broadband Cooperative, Inc.	CA	\$81,148,788	This approximately \$81.1 million award will allow the California Broadband Cooperative to offer affordable middle-mile broadband service in California and Nevada. The project plans to directly connect 230 community institutions to broadband. As many as 62,400 people stand to benefit as do 2,500 businesses. In addition to the more than 400 jobs the California Broadband Cooperative estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	CVIN	CA	\$46,619,757	This approximately \$46.6 million award, with nearly \$20 million in matching contributions, will allow Central Valley Independent Network (CVIN) to offer affordable middle-mile broadband service in the Central Valley region of California. The project plans to directly connect up to 63 community institutions to broadband. As many as 3.6 million people stand to benefit as do 160,000 businesses. In addition to the over 280 jobs CVIN estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.

DOC	Motorola, Inc.	CA	\$50,593,551	This approximately \$50.6 million award, with nearly \$21.9 million in matching contributions, will allow public safety entities in the San Francisco area to deploy an interoperable wireless public safety broadband network. The project plans to serve 200 existing public safety sites and up to 50,000 public safety users in the greater San Francisco Bay Area. As many as 6 million people stand to benefit from this project.
DOC	Plumas Sierra Telecommunications	CA	\$13,770,240	This approximately \$13.8 million award will allow Plumas Sierra Rural Electric Cooperative to offer affordable middle-mile broadband service in California, foster economic development, and improve education, and healthcare in rural areas of the state. The project plans to directly connect 18 community institutions to broadband. As many as 33,000 people stand to benefit as do 2,100 businesses. In addition to the more than 180 jobs Plumas Sierra estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Foundation For Calif Community Colleges	CA	\$10,944,843	This approximately \$10.9 million award will allow the Foundation for California Community Colleges to provide outreach, training, and educational support to increase digital literacy skills and broadband adoption as well as encourage broadband usage among students and their families, especially among low-income Hispanic residents in the Central Valley region. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Zerodivide	CA	\$686,157	This approximately \$686,000 award, with nearly \$300,000 in matching contributions, will allow ZeroDivide to increase broadband usage among the 15 Native American tribes in rural San Diego County, California as part of its Tribal Digital Village project, which will provide 8,900 tribal residents and 2,000 residents living in adjacent communities with broadband training, awareness, and adoption programs. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Zerodivide	CA, HI, NM, OR, UT, WA	\$1,384,242	This \$1.4 million award, with \$605,000 in matching contributions, will allow ZeroDivide to expand broadband access to low-income youth in communities across California, Hawaii, New Mexico, Oregon, Utah, and Washington. The project plans to provide training and support services to encourage sustainable adoption and technology awareness with a focus on disadvantaged communities. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.

DOC	District Of Columbia Government	DC	\$4,196,777	This approximately \$4.2 million award will allow the District of Columbia Government to drive demand for broadband in economically troubled neighborhoods in the city by launching the DC-BETA project, which plans to provide broadband-related outreach, digital literacy courses, workforce skills training, refurbished computers, and facilitate home broadband usage among vulnerable populations. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Echostar XI Operating LLC	Eastern and Midwest	\$14,159,250	This approximately \$14 million award, will allow Echostar XI Operating LLC to offer satellite broadband service to rural residential and commercial subscribers in regions 4, 5, and 6. Approximately 42,478 people stand to benefit, as do roughly 1,888 businesses. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Florida Rural Broadband Alliance	FL	\$23,693,665	This approximately \$23.7 million award, with nearly \$10.5 million in matching contributions, will allow the Florida Rural Broadband Alliance to offer affordable middle-mile broadband service in large portions of the northwestern and south-central regions of Florida. The project plans to directly connect 190 community institutions to broadband. As many as 417,600 people stand to benefit as do 16,000 businesses. In addition to the more than 120 jobs the Florida Rural Broadband Alliance estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Tallahassee, City Of (Inc)	FL	\$1,212,020	This approximately \$1.2 million award will allow the City of Tallahassee, Florida to utilize broadband technology to enhance workforce skills, educational opportunities, and digital literacy among low-income, low-literacy residents in economically depressed, underserved areas of the city. The project will also provide an online broadband accessibility curriculum for K-12 students to develop digital literacy and other skills. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Tampa Housing Authority	FL	\$2,131,322	This approximately \$2.1 million award will allow the Tampa Housing Authority to encourage broadband subscribership and awareness within 23 public housing sites with economically disadvantaged residents. The project will serve 17 diverse community institutions and offer skills and job training classes to residents. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.

USDA	Quincy Telephone Company	FL (84%) GA (16%)	\$1,363,547	This approximately \$1.3 million award matched by \$454,515 in private contribution, will allow Quincy Telephone Company to offer broadband service speeds of up to 20 megabytes per second in Gadsden County, Florida and Decatur County, Georgia. Approximately 1,331 people stand to benefit, as do roughly 14 businesses and 2 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Windstream Corporation	GA	\$4,665,116	This approximately \$4.6 million award matched by \$1,555,038 in private contribution, will allow Windstream Corporation to offer broadband service speeds of up to 12 megabytes per second in the counties of Appling, Charlton, Dodge, Early, Miller, Rabun, Seminole, Tattnall, Telfair, Upson, Walker, and Wayne. Approximately 8,723 people stand to benefit, as do roughly 284 businesses and 35 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
USDA	South Georgia Regional Information Technology Authority	GA	\$13,327,030	This approximately \$13 million award, will allow the South Georgia Regional Information Technology Authority to offer 700 MHz and 2.5 GHz 4G mobile and fixed wireless broadband service in the rural southwest counties of Baker, Calhoun, Early, Miller, and Mitchell. Approximately 53,000 people stand to benefit, as do roughly 2,272 businesses and 246 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Iowa Telecommunications Services, Inc	IA	\$5,163,935	This approximately \$5 million award matched by \$1,721,312 in private contribution, will allow Iowa Telecommunications Services, Inc to offer a Fiber-To-The-Node (FTTN) network that will connect DSL nodes in 42 service areas to fiber optic cable that will enable broadband speeds from 3 megabytes per second (Mbps) to 15Mbps. Approximately 7,270 people stand to benefit, as do roughly 7,367 businesses. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Iowa Telecommunications Services, Inc	IA	\$12,236,836	This approximately \$12 million award matched by \$4,078,946 in private contribution, will allow Iowa Telecommunications Services, Inc to offer a FTTN network that will connect DSL nodes in 80 service areas to fiber optic cable that will enable broadband speeds from 3Mbps to 15Mbps. Approximately 9,293 people stand to benefit, as do roughly 14,291 businesses. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.

USDA	Southwest Telephone Exchange, Inc.	IA	\$5,987,330	This approximately \$6 million award will allow Southwest Telephone Exchange, Inc. to implement the Southwest Iowa Fiber-to-the-Home Broadband Deployment project to provide broadband service to the towns of Imogene, Emerson, Henderson and their surrounding rural areas. Approximately 1,468 people stand to benefit, as do roughly 55 businesses and 9 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
USDA	The Municipal Communications Utility of the City of Cedar Falls, aka Cedar Falls Utility	IA	\$873,433	This approximately \$873,000 award, matched by an equal amount in private contribution, will allow Cedar Falls Utilities to offer broadband service speeds of up to 50 Mbps in rural Black Hawk, Butler and Grundy Counties. The new broadband system will employ a combination of state-of-the-art broadband wireless and FTTP technologies in an area that is 90 percent unserved. Approximately 1,753 people stand to benefit, as do roughly 259 businesses. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Nez Perce Tribe	ID	\$1,569,109	This approximately \$1.6 million award with approximately \$700,000 in matching contributions, will allow the Nez Perce Tribe to offer affordable middle-mile broadband service in northern Idaho. The project plans to directly connect as many as 18 community institutions to broadband. As many as 11,520 people stand to benefit as do 4,000 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Idaho Commission For Libraries	ID	\$1,907,531	This approximately \$1.9 million award, matched by nearly \$943,000 in matching contributions, will allow the Idaho Commission for Libraries to increase connectivity and computing capacity in the state's 55 least-connected public libraries by enhancing broadband speeds, deploying 230 new public computers, and upgrading 125 workstations to meet the increased demand. The project will also offer educational, employment and e-government services to economically vulnerable populations in the state. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Cellular Properties, Inc.	IL	\$12,264,520	This approximately \$12 million award matched by \$12,264,520 in private contribution, will allow Cellular Properties, Inc. to provide both mobile and fixed wireless broadband service over a 3G Universal Mobile Telecommunications Network (UMTS) in 11 rural counties in eastern Illinois. Fiber-To-The-Tower (FTTT) will also be deployed to provide an upgrade path to a 4G LTE network in the future. Approximately 66,513 people stand to benefit, as do roughly 7,123 businesses and 704 community institutions. In addition to the more than 267 jobs Cellular Properties, Inc. estimates this project will create upfront, it will provide a foundation for economic growth and job creation for decades to come.

USDA	Utopian Wireless Corporation	IL	\$264,362	This approximately \$264,000 award, will allow Utopian Wireless Corporation to bring WiMAX infrastructure to rural communities in and around Bushnell. Utopian will provide 4G portable/mobile broadband access over a licensed 2.5 GHz spectrum. Approximately 3,703 people stand to benefit, as do roughly 102 businesses and 32 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Utopian Wireless Corporation	IL	\$518,855	This approximately \$519,000 award, will allow Utopian Wireless Corporation to bring WiMAX infrastructure to rural communities in and around Flora. Utopian will provide 4G portable/mobile broadband access over a licensed 2.5 GHz spectrum. Approximately 6,978 people stand to benefit, as do roughly 276 businesses and 86 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Central Management Services	IL	\$61,895,282	This approximately \$61.9 million award, matched by nearly \$34.5 million in matching contributions, will allow the Illinois Department of Central Management Services (CMS) to offer affordable middle-mile broadband service in northeastern, central and southern Illinois. The project plans to directly connect 400 community institutions to broadband. As many as 9.4 million people stand to benefit as do 285,000 businesses. In addition to the more than 160 jobs CMS estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Delta Communications LLC	IL	\$31,515,253	This approximately \$31.5 million award, matched by nearly \$13.9 million in matching contributions, will allow Clearwave Communications to offer affordable middle-mile broadband service in Illinois. The project plans to directly connect 232 community institutions to broadband. As many as 720,000 people stand to benefit as do 55,000 businesses. In addition to the more than 150 jobs Clearwave Communications estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Wave Wireless, L.L.C.	KS	\$2,476,588	This approximately \$2 million award, will allow Wave Wireless, L.L.C. to expand a current fixed wireless network to new locations in Cherokee, Crawford, Labette, and Neosho Counties in order to provide high-speed Internet access services. Approximately 7,225 people stand to benefit, as do roughly 2,106 businesses and 72 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.

USDA	Windstream Corporation	KY	\$27,644,292	This approximately \$27.6 award matched by \$9,214,764 in private contribution, will allow Windstream Corporation to offer broadband service speeds at a minimum of 6 megabytes per second in over 80 rural communities. Approximately 277,000 people stand to benefit, as do roughly 10,557 businesses and 588 community institutions. In addition to the more than 390 jobs Windstream Corporation estimates this project will create upfront, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Windstream Corporation	KY	\$31,118,534	This approximately \$31 million award matched by \$10,372,845 in private contribution, will allow Windstream Corporation to offer broadband service speeds of up to 12 megabytes per second in over 80 rural communities. Approximately 272,000 people stand to benefit, as do roughly 8,156 businesses and 675 community institutions. In addition to the more than 500 jobs Windstream Corporation estimates this project will create upfront, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Boat People SOS, Inc.	KY	\$392,000	This approximately \$392,000 award, with more than \$200,000 in matching contributions, will allow Boat People SOS to provide broadband access, training, education, and support for the underserved Vietnamese immigrant and refugee community in South Louisville and the surrounding areas in Jefferson County, Kentucky. The project plans to deploy 20 new broadband computer workstations that will enable access for an additional 840 users at local libraries each week. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	KY Arts, Education & Humanities Cabinet	KY	\$1,349,826	This approximately \$1.3 million award will allow the Kentucky Arts, Education & Humanities Cabinet to deploy up to 520 new public computer workstations, enhance 300 additional workstations, and upgrade 60 public libraries and workforce centers in Kentucky. The project plans to offer public training and skills courses for residents, with a goal of increasing access, usage and educational opportunities in areas with especially high poverty, disability, and unemployment levels. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Nexus Systems, Inc.	LA	\$9,163,384	This approximately \$9.2 million award will allow Nexus Systems to build a hybrid fiber-microwave middle mile and wireless last-mile network in seven underserved parishes in the north central portion of Louisiana. The project plans to directly connect as many as 110 community institutions to broadband. As many as 133,000 people stand to benefit as do 1,800 businesses. In addition to the approximately 135 jobs Nexus Systems estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.

DOC	Bloomingtondale Communications Inc	MI	\$5,646,473	This approximately \$5.6 million award will allow Bloomingtondale Communications to offer affordable middle-mile broadband service in southwest Michigan. The project plans to directly connect 40 community institutions to broadband. As many as 32,400 people stand to benefit as do 1,000 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Michigan State University	MI	\$6,056,819	This approximately \$6.1 million award will allow Michigan State University to establish and upgrade more than 200 public computer centers in the south-central Michigan region, reducing the wait time for computer workstations and enabling access for an additional 180,000 weekly users at public centers. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Merit Network Inc	MI, MN, WI	\$69,639,291	This approximately \$69.6 million award will allow Merit Network to offer affordable middle-mile broadband service in Michigan's Upper Peninsula and Lower Northern Peninsula, with additional connections to research and educational networks in Wisconsin and Minnesota. The project plans to directly connect 61 community institutions to broadband. As many as 1.8 million people stand to benefit as do 49,000 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Sjoberg's, Inc.	MN	\$866,060	This approximately \$866,000 award, will allow Sjoberg's, Inc. to offer FTTH broadband service in Roseau, Thief River Falls, as well as the hamlet of Fox. This project will benefit many small farms located in the "grain belt". Approximately 656 people stand to benefit, as do roughly 15 businesses and 3 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
DOC	County of Carver	MN	\$5,995,600	This nearly \$6 million award will allow the County of Carver to offer affordable middle-mile broadband service in south-central Minnesota. The project plans to directly connect 86 community institutions to as well as all public safety 800 MHz towers in the county, allowing more reliable and efficient service to public safety and first responders. As many as 57,600 people stand to benefit as do 2,700 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.

DOC	Enventis	MN	\$16,822,437	This approximately \$16.8 million award, with more than \$7.2 million in matching contributions, will allow Enventis Telecom to offer affordable middle-mile broadband service in Minnesota. The project plans to directly connect 70 community institutions to broadband. As many as 350,400 people stand to benefit as do 28,000 businesses. In addition to the more than 250 jobs Enventis estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
USDA	United Electric Cooperative, Inc.	MO	\$21,213,106	This approximately \$21 million award, will allow United Electric Cooperative, Inc. to offer a FTTP network with a patented, cost effective design. Services offered will include triple play bundles from multiple internet, video, and voice providers, as well as home security, distance learning and telemedicine.
DOC	Bluebird Media, LLC	MO	\$45,145,250	This approximately \$45.1 million award, matched by nearly \$19.7 million in matching contributions, will allow BlueBird Media to offer affordable middle-mile broadband service in economically distressed areas of Northern Missouri. The project plans to directly connect 350 community institutions to broadband. As many as 1.4 million people stand to benefit as do 57,000 businesses. In addition to the more than 700 jobs BlueBird Media estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Smithville Telephone Company, Inc.	MS	\$7,110,886	This approximately \$7 million award, will allow Smithville Telephone Company, Inc. to offer a combination of FTTP and advanced DSL services offering a minimum of 20Mbps across Smithville Telephone's entire service area in the rural portions of Itawamba and Monroe Counties in the state's northeastern area. Approximately 1,795 people stand to benefit, as do roughly 15 businesses and 5 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Contact Network Inc.	MS	\$11,584,467	This approximately \$11.6 million award will allow Contact Network to offer affordable middle-mile broadband service throughout 12 economically distressed counties in the Mississippi Delta region. The project plans to directly connect up to 130 community institutions to broadband. As many as 172,800 people stand to benefit as do 3,100 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	State of Mississippi	MS	\$70,055,000	This approximately \$70 million award will allow public safety entities throughout the state to deploy an interoperable wireless public safety broadband network, using the 700 MHz spectrum, to every public safety agency in the state. The project plans to serve 90 hospitals and 340 ambulances and up to 9,900 public safety users throughout Mississippi. As many as 2.8 million people stand to benefit from this project.

USDA	Hughes Network Systems	Nationwide	\$58,777,306	This approximately \$59 million award, will allow Hughes Network Systems to offer satellite broadband service to rural residential and commercial subscribers nationwide. Approximately 258,685 people stand to benefit, as do roughly 3,200 businesses. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Yadkin Valley Telephone Membership Corporation	NC	\$21,668,232	This approximately \$21 million award, will allow Yadkin Valley Telephone Membership Corporation to offer a diverse Fiber-To-The-Home (FTTH) network to areas of six counties in the Piedmont area of western North Carolina. Approximately 12,803 people stand to benefit, as do roughly 606 businesses and 56 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
DOC	City of Charlotte	NC	\$16,702,490	This approximately \$16.7 million award will allow public safety entities in the city to deploy an interoperable wireless public safety broadband network in the Charlotte/Mecklenburg County area. The project plans to construct 24 new wireless towers to complement six existing towers on the network, and bring over 11,000 public safety end users onto the system. As many as 890,000 people stand to benefit from this project.
DOC	MCNC	NC	\$75,757,289	This approximately \$75.8 million award will allow MCNC to offer affordable middle-mile broadband service in 69 of the most economically disadvantaged rural counties along the northern and southern borders of North Carolina. The project plans to directly connect 170 community institutions to broadband. As many as 5.1 million stand to benefit as do 160,000 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Olive Hill Comm Economic Development	NC	\$448,742	This nearly \$450,000 award will allow the Olive Hill Community Economic Development Corporation to expand access to broadband in the greater western region of North Carolina by establishing a public computer center and providing community training and support, with a focus on helping disadvantaged local businesses, the unemployed, and individuals seeking higher education opportunities. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	WinstonNet Inc	NC	\$926,537	This approximately \$926,000 award, with \$696,000 in matching contributions, will allow WinstonNet to improve broadband access for communities with the greatest need in Forsyth County, North Carolina. The project plans to upgrade public computers workstations and provide new equipment for 38 public computer centers. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.

DOC	Dakota Carrier Network	ND	\$10,781,157	This approximately \$10.8 million award, matched by more than \$4.6 million in matching contributions, will allow the Dakota Carrier Network to offer affordable middle-mile broadband service in North Dakota. The project plans to directly connect 175 community institutions to broadband. As many as 6,400 people stand to benefit as do 600 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	NebraskaLink	NE	\$11,547,866	This approximately \$11.5 million award, with nearly \$5 million in matching contributions, will allow NebraskaLink to offer affordable middle-mile broadband service in communities throughout the state. The project plans to directly connect up to 100 community institutions to broadband. As many as 204,000 people stand to benefit as do 8,000 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Nebraska, State Of	NE	\$2,416,403	This approximately \$2.4 million award, with nearly \$1.3 million in matching contributions, will allow the State of Nebraska to expand broadband computer service to economically at-risk populations in the state by upgrading broadband access for approximately 45 public computer centers, deploying more than 600 new workstations and upgrading another 475 workstations, and providing computer literacy training at libraries across the state. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	NJ Department of Treasury	NJ	\$39,638,152	This approximately \$39.7 million award will allow public safety entities in the Northern New Jersey Urban Area Security Initiative region to deploy an interoperable wireless public safety broadband network. The project plans to serve 51 public safety agencies and more than 30,000 public safety users. As many as 4.5 million people stand to benefit from this project.
DOC	Department of Information Technology	NM	\$38,699,997	This approximately \$38.7 million award, with approximately \$17 million in matching contributions, will allow public safety entities in New Mexico to deploy an interoperable wireless public safety broadband network in the Albuquerque and Santa Fe metropolitan areas. The project plans to serve 14 sites and up to 1,500 public safety users. As many as 600,000 people stand to benefit from the public safety aspect of this project. This project will also connect 150 additional community anchor institutions.

DOC	E.N.M.R. Telephone Cooperative	NM, TX	\$16,460,815	This approximately \$16.5 million award, with more than \$7 million in matching contributions, will allow ENMR-Plateau to offer affordable middle-mile broadband service in New Mexico and Texas. The project plans to directly connect 287 community institutions to broadband. As many as 115,000 people stand to benefit as do 3,800 businesses. In addition to the more than 100 jobs ENMR-Plateau estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Nevada Hospital Association	NV	\$19,643,717	This approximately \$19.6 million award will allow the Nevada Hospital Association to build and operate a statewide telemedicine network to be made available to 37 medical providers throughout the state, with additional capacity for use by public safety agencies, educational institutions, tribal governments, and last-mile Internet service providers. As many as 56,000 people stand to benefit as do 1,700 businesses. In addition to the more than 100 jobs the Nevada Hospital Association estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	PYRAMID LAKE PAIUTE TRIBE	NV	\$7,070,006	This approximately \$7.1 million award will allow the Pyramid Lake Paiute Tribe to offer affordable middle-mile broadband service in Nevada and expand access to online tools like distance learning, telemedicine and enhanced public safety services on its reservation. The project plans to directly connect local community institutions to broadband. As many as 1,500 people stand to benefit. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Windstream Corporation	NY	\$855,901	This approximately \$856,000 award, will allow Windstream Corporation to offer broadband service speeds of up to 12 megabytes per second in Clymer, Columbus, Ellery, French Creek, Mina, and Sherman. Approximately 1,747 people stand to benefit, as do roughly 8 businesses and 8 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Labor, New York Department Of	NY	\$536,737	This approximately \$536,000 award matched by more than \$230,000 in matching contributions, will allow the New York Department of Labor to expand broadband computer access in the state and partner with other agencies and organizations to leverage their extensive investment in equipment, software, and training materials. The project plans to connect 20 of the state's existing public workforce investment One Stop Career Centers to occupational skills training and career planning services from three state organizations, expanding these services to low-income areas where the training is not available locally. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.

DOC	Horizon Telecom, Inc	OH	\$66,474,247	This approximately \$66.5 million award, with nearly \$28.5 million in matching contributions, will allow Horizon Telecom to offer affordable middle-mile broadband service in Appalachian Ohio. The project plans to directly connect 600 community institutions to broadband. As many as 1.7 million people stand to benefit as do 37,000 businesses. In addition to the more than 230 jobs Horizon Telecom estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Connected Nation, Inc.	OH	\$6,856,399	This approximately \$6.9 million award, with more than \$3.1 million in matching contributions, will allow Connected Nation to encourage broadband adoption in Ohio by deploying up to 2,000 new public computer workstations, upgrading 317 compute centers, and conducting training sessions at community institutions throughout the state. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	OneCommunity	OH	\$44,794,046	This approximately \$44.8 million award, with more than \$25 million in matching contributions, will allow One Community to offer affordable middle-mile broadband service in northeastern Ohio. The project plans to directly connect nearly 800 community institutions to broadband. As many as 5 million people stand to benefit as do 210,900 businesses. In addition to the nearly 200 jobs this project will create, it will provide a foundation for economic growth and job creation for generations to come.
USDA	Oklahoma Communication Systems, Inc.	OK	\$3,570,745	This approximately \$4 million award matched by \$1,190,248 in private contribution, will allow Oklahoma Communication Systems, Inc. to offer DSL broadband service in Oklahoma Communication's rural service territory comparable to that in its more populated areas. The network is also engineered so that it can be easily upgraded at a reasonable cost to meet future needs. Approximately 2,193 people stand to benefit, as do roughly 34 businesses and 1 community institution. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Pine Telephone Company, Inc.	OK	\$9,754,430	This approximately \$9.7 million award, will allow Pine Telephone Company, Inc. to offer 3G universal mobile broadband service in southeast Oklahoma; Coal, Latimer, Le Flore, and Pittsburg counties, within the Choctaw Nation. Approximately 7,700 people stand to benefit, as do roughly 107 businesses and 26 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.

DOC	Oklahoma Office of State Finance	OK	\$73,998,268	This approximately \$74 million award will allow the Oklahoma Office of State Finance to offer affordable middle-mile broadband service in communities throughout the state. The project plans to directly connect over 30 community institutions to broadband. As many as 2.25 million people stand to benefit as do 56,000 businesses. In addition to the more than 860 jobs the Oklahoma Office of State Finance estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Keystone Wireless, LLC	PA	\$36,382,885	This approximately \$36 million award, will allow Keystone Wireless, LLC to offer 3G broadband service in central Pennsylvania; Centre, Lycoming, Union, Northumberland, Snyder, Clinton, Schuylkill, Berks, and Mountour counties. Approximately 963,820 people stand to benefit, as do roughly 26,882 businesses and 9,035 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Wireless Neighborhoods	PA	\$784,000	This approximately \$784,000 award will allow Wireless Neighborhoods to provide enhanced Internet access and online tools to predominantly low-income communities in Pittsburgh, Pennsylvania. The project plans to deploy 160 new public workstations at four new computer centers in the city. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	County of Oconee	SC	\$9,604,840	This approximately \$9.6 million award, with more than \$4.7 in matching contributions, will allow the County of Oconee to offer affordable middle-mile broadband service in South Carolina. The project plans to directly connect as many as 150 community institutions to broadband. As many as 66,700 people stand to benefit as do 2,400 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Connected Tennessee, Llc	TN	\$2,287,387	This approximately \$2.3 million award will allow Connected Tennessee to expand broadband computer access as part of its Computers 4 Kids program, which will focus on driving adoption and awareness among vulnerable youth by providing them with academic support, workforce training, and computer equipment. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
USDA	TierOne Converged Networks, Inc.	TX	\$19,244,200	This approximately \$19 million award, will allow TierOne Converged Networks, Inc. to offer broadband service speeds of up to 6.5 megabytes per second in 11 north Texas counties. Approximately 246,344 people stand to benefit, as do roughly 12,726 businesses and 874 community institutions. In addition to the more than 1,100 jobs TierOne Converged Networks estimates this project will create upfront, it will provide a foundation for economic growth and job creation for decades to come.

DOC	Peoples Telephone Cooperative	TX	\$28,825,356	This approximately \$28.8 million award will allow the Peoples Telephone Cooperative (PTC) to offer affordable middle-mile broadband service in eastern Texas. The project plans to directly connect as many as 190 community institutions to broadband. As many as 241,000 people stand to benefit as do 10,300 businesses. In addition to the approximately 100 jobs PTC estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Texas A&M University	TX	\$6,550,775	This approximately \$6.6 million award, with nearly \$3 million in matching contributions, will allow Texas A&M University System to offer affordable middle-mile broadband service in areas of Texas. The project plans to connect almost 50 community anchor institutions, including more than 12 institutions of higher education serving more than 110,000 students and 27,000 faculty and staff. As many as 231,000 people stand to benefit as do 4,200 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	City of Brownsville	TX	\$865,920	This approximately \$865,000 award, matched by more than \$370,000 in matching contributions, will allow the City of Brownsville, Texas to foster economic growth by increasing public computer access and awareness of the benefits of broadband. The project will enhance existing public computer workstations, deploy 176 new workstations, and engage new users through teacher-led training. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Library & Archives Commission, TX State	TX	\$7,955,941	This approximately \$8 million award, with nearly \$3.7 million in matching contributions, will allow the Texas State Library & Archives Commission to deploy the Technology, Expertise, Access and Learning for all Texans (TEAL) project which will provide greater broadband computer access at faster speeds by upgrading 125 public computer centers and establishing approximately 30 new centers equipped with 2,200 new workstations. In addition to the more than 125 jobs TEAL estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	UTOPIA	UT	\$16,229,321	This approximately \$16.2 million award, with more than \$7.8 million in matching contributions, will allow UTOPIA to offer affordable middle-mile broadband service in the Great Salt Lake region of northern Utah. The project plans to directly connect as many as 400 community institutions to broadband. As many as 369,600 people stand to benefit as do 31,000 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.

DOC	Citizens' Telephone Cooperative	VA	\$9,237,760	This approximately \$9.2 million award will allow Citizens Telephone Cooperative to offer affordable middle-mile broadband service in the New River Valley region of Virginia. The project plans to directly connect more than 50 community institutions to broadband. As many as 163,000 people stand to benefit as do 1,300 businesses. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	County of Rockbridge	VA	\$6,993,399	This approximately \$7 million award, with nearly \$3 million in matching contributions, will allow the County of Rockbridge to offer affordable middle-mile broadband service in west-central Virginia. The project plans to directly connect up to 50 community institutions to broadband. As many as 33,000 people stand to benefit as do 1,300 businesses. In addition to the more than 100 jobs Rockbridge County estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Mid-Atlantic Broadband Cooperative	VA	\$10,023,247	This approximately \$10 million award will allow the Mid-Atlantic Broadband Cooperative (MBC) to offer affordable middle-mile broadband service in eastern Virginia. The project plans to directly connect 66 community institutions to broadband. As many as 84,000 people stand to benefit as do 340 businesses. In addition to the more than 100 jobs the MBC estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Virgin Islands Public Financing Authority	VI	\$58,888,469	This approximately \$58.9 million award, with nearly \$29.4 million in matching contributions, will allow the Virgin Islands Public Finance Authority to offer affordable middle-mile broadband service in the islands of St. Thomas, St. Croix, and St. John. The project plans to directly connect as many as 325 community institutions to broadband with a focus on key institutions like hospitals and public safety entities whose communications capabilities are frequently disabled by hurricanes and other heavy storms. As many as 103,200 people stand to benefit as do 2,500 businesses. In addition to the over 200 jobs the Virgin Islands Public Finance Authority estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Waitsfield-Fayston Telephone Co., Inc.	VT	\$5,559,975	This approximately \$5.5 million award, will allow Waitsfield-Fayston Telephone, Co. to offer FTTH broadband service in the counties of Addison, Chittenden, and Washington. Approximately 1,385 people stand to benefit, as do roughly 56 businesses and 2 community institutions. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.

DOC	Northwest Open Access Network	WA	\$54,452,347	This approximately \$54.5 million award, with more than \$23.5 million in matching contributions, will allow Northwest Open Access Network (NoaNet) to offer affordable middle-mile broadband service in Washington State. The project plans to directly connect as many as 285 community institutions to broadband. As many as 206,400 people stand to benefit as do 14,000 businesses. In addition to the more than 100 jobs NoaNet estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
USDA	Wildblue Communications	Western and Midwest	\$19,533,444	This approximately \$20 million award, will allow Wildblue Communications to offer satellite broadband service to rural residential and commercial subscribers in regions 1, 2, and 3. Approximately 110,150 people stand to benefit, as do roughly 4,896 businesses. In addition to the jobs this project will support upfront, it will provide a foundation for economic growth and job creation for decades to come.
DOC	University of Wisconsin System	WI	\$29,884,914	This approximately \$29.9 million award, with more than \$12.8 in matching contributions, will allow the University of Wisconsin – Extension Service (UWEX) to offer affordable middle-mile broadband service in communities across the state. The project plans to directly connect as many as 182 community institutions to broadband. As many as 333,600 people stand to benefit as do 9,000 businesses. In addition to the nearly 150 jobs UWEX estimates the project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	College Of Menominee Nations	WI	\$3,355,956	This approximately \$3.4 million award, matched by nearly \$1.7 million in matching contributions, will allow the College of Menominee Nation to upgrade and expand public computer services for the Menominee Indian tribe of Wisconsin as well as residents in nearby regions. The project plans to deploy up to 130 new workstations and increase hours of operation to serve an estimated 660 additional users per week as well as provide educational and skills training to residents. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
DOC	Milwaukee, City Of	WI	\$2,479,742	This approximately \$2.5 million award will allow the City of Milwaukee to enhance broadband capacity and availability for the public with a particular focus on economically vulnerable communities and areas of the city with higher poverty and unemployment rates. The project plans to deploy up to 270 new computer workstations, upgrade broadband speeds, and provide skills training to residents. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.

DOC	University Of Wisconsin System	WI	\$2,390,414	This approximately \$2.4 million award will allow the University of Wisconsin System to increase broadband usage through comprehensive and targeted broadband adoption programs in five needy communities in the state. The project will create seven public computer centers and develop targeted programs for tribes, farmers, senior citizens, students, and the unemployed. In addition to the jobs this project will create, it will provide a foundation for economic growth and job creation for decades to come.
