On July 9, 2015, more than 1,000 American Indian and Alaska Native youth—representing 42 states and 230 tribes—attended a White House event to discuss key issues in the lives of Native youth. In addition to youth who attended in person, others were able to participate remotely through the 65 watch parties that took place across the nation. Discussions took place in breakout sessions in which participants were asked to give feedback to Administration officials. What follows is a high-level summary of the discussions among the youth participants and Federal and non-profit officials.

We would like to thank United National Indian Tribal Youth, the Department of Health and Human Services, the Department of the Interior, and the Department of Justice for their support of the inaugural White House Tribal Youth Gathering.

We would also like to thank the future of Indian Country: the more than 1,000 Native American youth who attended this event as well as those who participated in over 65 watch parties across the country. We look forward to our continued collaboration and dialogue.

We look forward to our continued collaboration and dialogue across the federal government in partnership with Indian Country and organizations dedicated to improving the lives of Native youth.

**Disclaimer:** Summaries of the main themes and topics raised by the youth who attended the break-out sessions are included in this report. This readout serves as a record of some of the issues raised at each session. It does not necessarily reflect the views of all participants or the policy positions of the Obama Administration.
