---

the north american nature photography association has informed me of thisd welcome invitationfrom the obama administration to share my thoughts on my rights as a creator

any copying of art, designs or photographs from the internet for use without permission -- and without recompense to the artist -- hurts everybody in the creative arena...i am a photographer...i would suggest that all images put on the internet be required to have some sort of safeguard embedded in the image -- for instance, you cannot copy US paper money...
