OFFICE OF THE PRESIDENT OFFICE OF MANAGEMENT AND BUDGET WASHINGTON, D.C. 20503

THE DIRECTOR

May 20, 2013

The Honorable John A. Boehner Speaker of the House of Representatives Washington, D.C. 20515

Dear Mr. Speaker:

On April 10, 2013, the Office of Management and Budget (OMB) submitted to the Congress two reports on sequestration required by the Balanced Budget and Emergency Deficit Control Act of 1985 (BBEDCA), as amended: the *OMB Sequestration Preview Report to the President and Congress for Fiscal Year 2014*, and the *OMB Report to the Congress on the Joint Committee Reductions for Fiscal Year 2014*. This letter transmits corrections to the reports that address computational errors OMB identified in some of the underlying calculations. The most significant computational error occurred in calculating the sequestrable base for the Crime Victims Fund. Smaller computational errors also occurred in calculating the sequestrable base for four other accounts.

These corrections do not change the total reduction required by section 251A of BBEDCA. As a result of these corrections, the reduction to the FY 2014 nonsecurity spending limit is \$549 million less, the reduction to the Crime Victims Fund is \$688 million more, and the reduction to other non-Medicare direct spending is \$139 million less. The corrected figures are in the enclosed reports.

Sincerely,

Sylvia M. Burwell

Director

Enclosures

INTRODUCTION

The Budget Control Act of 2011 (BCA), <u>P.L. 112–25</u>, amended the Balanced Budget and Emergency Deficit Control Act of 1985 (BBEDCA) by reinstating limits ("caps") on discretionary budget authority, which expired after 2002. The 2013 and 2014 limits were revised further by the American Taxpayer Relief Act of 2012 (ATRA), <u>P.L. 112–240</u>. Section 254 of BBEDCA requires OMB to issue a sequestration preview report with the President's budget submission. This preview report, the first of the three required sequestration reports for 2014, provides the status of the discretionary caps for the current year and each year thereafter through 2021 as of the end of the second session of the 112th Congress based on current law, including further adjustments made to the current year (2013) caps in the <u>OMB Final Sequestration Report for FY 2013</u>, the release of which was delayed by ATRA. This report also includes adjustments to the budget year (2014) caps that are based on the reductions required pursuant to section 251A of BBEDCA as calculated in the <u>OMB Report to the Congress on the Joint Committee Reductions for Fiscal Year 2014</u>. Finally, this report details the President's proposals to restore the reductions in the 2014 caps to the levels agreed to in the bipartisan BCA as amended by ATRA.

Throughout each session of the Congress, OMB is required to monitor compliance with the discretionary spending limits. Within seven working days of enactment of an appropriations bill, OMB reports its estimates of the total discretionary budget authority and outlays provided by the legislation. If the bill provides additional appropriations for the current year, OMB also determines at that time whether the additional budget authority would cause total discretionary appropriations to exceed the caps. OMB makes the same determination for the budget year at the end of each session of the Congress. Appropriations that OMB estimates exceed the caps trigger an across-the-board reduction (or sequestration) to eliminate the excess spending. The law does not require that the Congress appropriate the full amount available under the discretionary caps.

OMB will issue a sequestration update report in August that will provide a mid-year status update on the caps and enacted appropriations, as well as a preview estimate of the 2014 adjustment for disaster funding. OMB will issue a final sequestration report for 2014 after the end of this congressional session that will contain final estimates of enacted appropriations and any adjustments to the discretionary caps. If it is determined that a breach has occurred, the final report will also include a Presidential Order for implementing a sequestration of non-exempt discretionary accounts to eliminate the breach as calculated by OMB. This sequestration, were it to occur, would be distinct from the Joint Committee sequestration pursuant to Section 251A of BBEDCA. As required by BBEDCA, OMB's estimates in each seven-day-after report and each sequestration report, including this report, are made using the same economic and technical assumptions underlying the President's Budget. In addition, each of these reports will contain comparisons between OMB's estimates and estimates from the Congressional Budget Office, where appropriate, and an explanation of any differences between those estimates.

CORRECTED VERSION

MAY 20, 2013

The estimate of the adjustment required to the revised nonsecurity category has been corrected to address computational errors. Otherwise, no changes have been made to the report.

DISCRETIONARY SEQUESTRATION PREVIEW REPORT

Discretionary programs are funded annually through the appropriations process. BBEDCA, as amended by the BCA and ATRA, limits—or caps—budget authority available for discretionary programs each year through 2021. Section 251 of BBEDCA originally specified for 2012 and 2013 separate "security" and "nonsecurity" categories for discretionary programs. The security category includes discretionary appropriations associated with agency budgets for the Department of Defense, the Department of Homeland Security, the Department of Veterans Affairs, the National Nuclear Security Administration, the Intelligence Community Management Account, and all discretionary budget accounts in budget function 150 (international affairs). The nonsecurity category includes all budget accounts that do not fall into the security category. After 2013, section 251 specified a single category for all discretionary spending referred to as the "discretionary" category.

Section 302 of the BCA provided for revisions to the caps if legislation proposed by the Joint Select Committee on Deficit Reduction to reduce the deficit by more than \$1.2 trillion was not enacted by January 15, 2012. Because such legislation was not enacted by this date, the section 302 revisions to the caps were triggered and reflected in the *OMB Final Sequestration Report for FY 2012*, issued on January 18, 2012.

As required by law, the security category was redefined to include only the discretionary programs in the defense budget function (050) (the "defense" category), which mainly consists of the Department of Defense and significant portions of agency budgets for the Department of Energy (including the National Nuclear Security Administration) and the Federal Bureau of Investigation. The nonsecurity category was redefined to consist of all discretionary programs not in the security category—essentially all non-defense (non-050) budget functions (the "non-defense" category). The defense and non-defense categories were put in place for 2013 through 2021, replacing the overall discretionary category for those years. While the separate caps were adjusted to reflect the redefinitions, the total amount of discretionary funding remained unchanged. However, section 901(d) of ATRA reinstated the original security and nonsecurity categories for 2013 only and reduced the caps by \$4 billion, split evenly between the security and nonsecurity categories. ATRA also lowered the 2014 caps by \$8 billion, split evenly between the defense and non-defense categories, and effectively left intact the defense/non-defense cap framework for 2014 through 2021.

Table 1 summarizes the history of changes that have occurred to the discretionary caps since their reinstatement and subsequent redefinition in the BCA and ATRA. Table 1 also summarizes the changes to these caps proposed in the 2014 Budget, which are discussed in more detail in the proposed and anticipated adjustments section below.

Current Law Adjustments to Discretionary Caps

BBEDCA permits certain adjustments to the discretionary caps. After consultation with the Congressional Budget Office and the Congressional Budget Committees, section 251(b)(1) allows for adjustments due to changes in concepts and definitions in this report. Section 251(b)(2) also authorizes certain adjustments after the enactment of appropriations. At this time, OMB includes no change to the caps for concepts and definitions or adjustments pursuant to section 251(b)(2).

Pursuant to section 251A of BBEDCA, reductions are required to the discretionary caps due to the failure of the Congress to enact sufficient deficit reduction legislation. OMB has no discretion in the calculation and allocation of the reductions. Instead, OMB must calculate the reductions pursuant to the requirements specified in the BCA. The reductions for 2013 were implemented by a

sequestration ordered on March 1, 2013. The 2014 reductions for discretionary spending are achieved through reductions to the discretionary caps. As explained in the *OMB Report to the Congress on the Joint Committee Reductions for Fiscal Year 2014*, the defense cap is required to be reduced by \$53,918 million and the non-defense cap is required to be reduced by \$36,609 million. These adjustments are made to the current law caps in Table 2. In subsequent preview reports, OMB will be required to implement reductions to the discretionary caps for future years unless legislation is enacted to cancel the Joint Committee reductions. Because those reductions are not required at this time and would

need to be recalculated based on the estimates of direct spending programs in future budgets, the discretionary defense and non-defense caps for 2015 through 2021 remain unadjusted at this point.

These reductions, especially when coupled with the cuts already in place for 2013, will be deeply destructive to national security, domestic investments, and core Government functions. The President believes that comprehensive deficit reduction is necessary to replace the Joint Committee reductions and set an appropriate level of discretionary spending in 2014 to support economic growth and job creation and provide for critical government services. As reflected in the proposals set forth in the President's 2014 Budget, including those specified in the next section, the President is willing to make tough choices. He stands ready to work with the Congress to enact comprehensive deficit reduction legislation that replaces the blunt Joint Committee reductions with responsible, balanced deficit reduction and puts the Nation on a sound long-term fiscal path.

Proposed and Anticipated Adjustments to Discretionary Caps

The President's Budget includes several proposals to revise the discretionary caps. The effects of these changes are reflected in Table 3. To accompany these proposals, the 2014 Budget proposes savings across the mandatory and revenue categories and, in the interest of reaching an agreement on a comprehensive deficit reduction package, reductions to the discretionary caps to replace the automatic reductions, restore the 2013 sequestration amounts, cancel the 2014 mandatory sequestration order, and adjust upward the 2014 defense and non-defense caps to the levels agreed to by the Congress in ATRA. In addition, the 2014 Budget proposes to extend the discretionary caps through 2023. These reductions to, and extensions of, the discretionary caps will achieve additional discretionary outlays savings of \$200 billion over the next decade when compared to current law. These reductions are split between the defense and non-defense categories and are timed to take effect beginning in 2017 when the economy is projected to have fully recovered.

The President's Budget also includes proposed changes in concepts and definitions that would reclassify as mandatory two transportation accounts that are currently funded from the General Fund as part of its passenger rail reauthorization. These changes are also included on Table 3. Please see "Budgetary Treatment of Surface Transportation Infrastructure Funding" in the Budget Process chapter in the *Analytical Perspectives* volume of the President's 2014 Budget for a full discussion of the policy.

Section 251(b)(2) of BBEDCA allows for adjustment of the discretionary caps provided that certain conditions are met and/or specific designations are provided. Several proposals included in the Budget, if enacted, would trigger these adjustments to the discretionary caps. The Budget also proposes to repeal two of these existing adjustments in order to shift funding for these purposes from discretionary to mandatory. These anticipated adjustments, shown in Table 3, include the following:

Emergency Appropriations and Overseas Contingency Operations/Global War on Terrorism (OCO/GWOT).—These adjustments are authorized by section 251(b)(2)(A) of BBEDCA and include funding for amounts that the Congress designates in law and the President subsequently so designates as being either an emergency requirement or for OCO/GWOT activities on an account-by-account basis. In 2013, \$41,669 million was designated as an emergency requirement in response to Hurricane Sandy in the 2013 Disaster Relief Appropriations Act (P.L. 113-2). For 2014, however, the President's Budget does not propose any adjustments for emergency funding. 2013 appropriations for the Defense, Homeland Security, Military Construction and Veterans Affairs, and State and Foreign Operations

subcommittees, all included in the Consolidated and Further Continuing Appropriations Act (P.L. 113-6), provided a total of \$98,682 million (including rescissions) for OCO/GWOT purposes for 2013. For 2014, the President's Budget proposes to continue its 2013 Budget policy of placing a cumulative ceiling on the OCO/GWOT cap adjustment of \$450 billion from 2013 to 2021. The President's Budget currently includes \$92,289 million for OCO/GWOT activities for 2014, of which \$3,807 million is for international programs. However, at the time the budget was printed, the Department of Defense (DOD) had not made final decisions about the pace of the drawdown in Afghanistan. Once DOD's OCO/GWOT needs for 2014 are determined, a budget amendment package will be transmitted subsequent to release of the Budget. For now, a placeholder for DOD that is equal to the 2013 Budget Request of \$88,482 million is assumed in its place. The Budget also includes a cap adjustment of \$37.3 billion for OCO/GWOT activities for each year in 2015 through 2021. The 2015-2021 levels reflect a placeholder of annual amounts for a total funding level for OCO/GWOT activities but do not reflect specific policy decisions as to how the funds will ultimately be allocated across those years. The budget amendment package for DOD will note if any changes to this assumption are necessary based on the final 2014 request. The DOD OCO/GWOT amounts are allocated to the defense category on Table 3, while the international and outyear placeholder amounts are allocated to the non-defense category.

Continuing Disability Reviews (CDRs) and Redeterminations.—Section 251(b)(2)(B) of BBEDCA authorizes adjustment of the caps by the amounts appropriated for CDRs and redeterminations. The maximum cap adjustment in each year is limited to the levels of budget authority specified in BBEDCA, provided that a base level of \$273 million is provided for these purposes in the underlying appropriations bill before the adjustment. In the 2013 Consolidated and Further Continuing Appropriations Act (P.L. 113-6), \$483 million was provided as a cap adjustment—an amount sufficient only to maintain activities at the 2012 level, and \$268 million below the adjustment permitted under BBEDCA. The intent of this adjustment was to ensure sufficient resources for the Social Security Administration (SSA) to reduce improper payments and achieve tens of billions of dollars in deficit savings over the next ten years. However, the failure to provide the full level of adjustment authorized by BBEDCA and the uncertainty of annual appropriations for these activities has made these savings difficult to realize. As noted in OMB's Final Sequestration Report for FY 2013, the Congress will forgo approximately \$1.9 billion in net deficit savings by not providing the full amount of the cap adjustment authorized for 2013. In order to better ensure these resources are provided, the Budget proposes instead to provide dedicated mandatory funding for these activities beginning in 2013. If mandatory funding is provided, the Budget proposes to eliminate the discretionary cap adjustment beginning in 2014 and to reduce the discretionary caps by the base funding for these activities beginning in 2015. The base appropriation of \$273 million would still be provided for 2014 through discretionary appropriations. The "Program Integrity Funding" discussion in the President's Budget Reform Proposals section of the Budget Process chapter in the Analytical Perspectives volume of the Budget provides a complete description of this and other program integrity efforts along with OMB's methodology in determining their effectiveness.

Health Care Fraud and Abuse Control (HCFAC).—Section 251(b)(2)(C) of BBEDCA authorizes adjustment of the caps by amounts appropriated for HCFAC activities. The maximum HCFAC cap adjustment in each year is limited to the levels of budget authority specified in BBEDCA, provided that a base level of \$311 million for these purposes is provided in the underlying appropriations bill before the adjustment. Because the 2013 Consolidated and Further Continuing Appropriations Act (P.L. 113–6) provided only \$310 million of base funding (not including an across-the-board rescission in the final 2013 Act), an amount sufficient only to maintain activities at roughly their 2012 level, *OMB's Final Sequestration Report for FY 2013* did not include an adjustment for this funding. This is the

second year in a row that the cap adjustment authorized by BBEDCA has not been provided, in whole or in part, for this program, which has led to an underfunding of efforts to prevent and reduce fraud and other improper payments in the Medicare and Medicaid programs. As noted in *OMB's Final Sequestration Report for FY 2013*, the Congress will forgo approximately \$450 million in deficit savings by not fully funding the base appropriation and providing the full cap adjustment authorized for 2013. As with CDRs and redeterminations at SSA, the Budget proposes to repeal the discretionary cap adjustment for HCFAC, but starting in 2013 since the cap adjustment was not used, and provide dedicated mandatory funding for these activities beginning in that fiscal year. The Budget continues to seek the 2014 base appropriation of \$311 million through discretionary appropriations, but after 2014 no discretionary funding would be provided for these activities and the discretionary non-defense caps are reduced accordingly. The "Program Integrity Funding" discussion in the President's Budget Reform Proposals section of the Budget Process chapter in the *Analytical Perspectives* volume of the 2014 Budget provides a for a fuller description of this and other program integrity efforts and OMB's methodology in determining their effectiveness.

Disaster Funding.—Section 251(b)(2)(D) of BBEDCA authorizes an adjustment to the caps for appropriations that are designated by the Congress as being for "disaster relief," which is defined as activities carried out pursuant to a determination under section 102(2) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122(2)). BBEDCA sets a limit for the adjustment equal to the total of the average funding provided for disaster relief over the previous 10 years (excluding the highest and lowest years) plus any portion of the allowable adjustment (funding ceiling) for the previous year that was not appropriated (excluding the portion of the previous year's ceiling that was itself due to any unused amount from the year before). For the 2013 adjustment, OMB determined a preview estimate of \$11,779 million. The full level of \$11,779 million was provided for the Federal Emergency Management Agency's (FEMA's) Disaster Relief Fund (DRF) in one \$6,400 million appropriation in the 2013 Consolidated and Further Continuing Appropriations Act (P.L. 113-6) and one \$5,379 million appropriation in the 2013 Disaster Relief Appropriations Act (P.L. 113-2) in response to Hurricane Sandy. For 2014, OMB will present its preview estimate for disaster funding in its August update report. The 2014 Budget requests \$5,785 million in funding in two accounts to be designated for disaster relief by the Congress: \$5,626 million in FEMA's DRF to cover the costs of Presidentially-declared major disasters, including identified costs for previously declared catastrophic events and the predictable annual cost of non-catastrophic events expected to obligate in 2014, and \$159 million in the Small Business Administration's Disaster Loans Program Account for administrative expenses. For the DRF, the request does not include additional funding for Hurricane Sandy, because the funding tail could not yet be determined at the time of allocation. However, it should be noted that this event will be reflected in the 2015 Budget. Both of these amounts are shown on Table 3 as an anticipated cap adjustment to the non-defense category. See "Disaster Relief Funding" in the President's Budget Reform Proposals section of the Budget Process chapter in the Analytical Perspectives volume of the 2014 Budget for a full description of this adjustment and the Administration's 2014 Request.

In addition to these adjustments, the 2014 Budget proposes to amend section 251(b)(2) of BBEDCA by adding two new discretionary cap adjustments related to program integrity efforts. These new adjustments are for tax enforcement, including tax compliance to address the Federal tax gap, via the Internal Revenue Service's (IRS) Enforcement and Operations Support accounts and the Alcohol and Tobacco Tax and Trade Bureau (TTB), and for in-person reemployment and eligibility assessments and unemployment insurance improper payment reviews by the Department of Labor. These new

adjustments total \$412 million for IRS and TTB and \$20 million for the Department of Labor in 2014, and are included in Table 3 as anticipated adjustments to the proposed non-defense caps in all years. For more information on these new adjustments see the "Program Integrity Funding" section of the Budget Process chapter of the *Analytical Perspectives* volume of the 2014 Budget.

Corrected Version May 20, 2013

OMB REPORT TO THE CONGRESS ON THE JOINT COMMITTEE REDUCTIONS FOR FISCAL YEAR 2014

Due to the failure of the Joint Select Committee on Deficit Reduction to propose, and the Congress to enact, legislation to reduce the deficit by \$1.2 trillion, the Balanced Budget and Emergency Deficit Control Act (BBEDCA), as amended, requires the Office of Management and Budget (OMB) to calculate reductions of fiscal year (FY) 2014 budgetary resources when the FY 2014 Budget is transmitted. This report provides OMB's calculations of the reductions to the discretionary spending limits ("caps") specified in section 251(c) of BBEDCA for FY 2014 and a listing of the FY 2014 reductions required through sequestration for each non-exempt budget account with direct spending.

OMB calculates that the Joint Committee reductions will lower the discretionary cap for the revised security (defense) category by \$54 billion and for the revised non-security (nondefense) category by \$37 billion. Additionally, the Joint Committee reductions require sequestration reductions to non-exempt direct spending of 2.0 percent to Medicare, 7.2 percent to other non-exempt nondefense mandatory programs, and 9.8 percent to non-exempt defense mandatory programs.

Calculation of Annual Reduction by Function Group

Under section 251A of BBEDCA, the failure of the Joint Select Committee on Deficit Reduction to propose, and the Congress to enact, legislation to reduce the deficit by \$1.2 trillion triggers automatic reductions in FY 2014 through adjustments in the discretionary spending limits and a sequestration of direct spending. As shown in Table 1, the total amount of deficit reduction required is specified by formula in section 251A(3), starting with the total reduction of \$1.2 trillion required for FY 2013 through FY 2021, deducting a specified 18 percent for debt service savings, and then dividing the result by 9 to calculate the annual reduction of \$109 billion for each year from FY 2013 to FY 2021. The annual reduction is split evenly between budget accounts in function 050 (defense function) and in all other functions (nondefense function), so that each function group will be reduced by \$54.667 billion.

Table 1. CALCULATION OF TOTAL ANNUAL REDUCTION BY FUNCTION

(In billions of dollars)

Joint Committee required savings	1,200.000
Deduct debt service savings (18%)	-216.000
Net programmatic reductions	984.000
Divide by 9 to calculate annual reduction	109.333
Split 50/50 between defense and nondefense functions	54.667

Base for Allocating Reductions and Method of Reduction

The annual reduction is further allocated between discretionary and direct spending within each of the function groups. Once the reductions are allocated, separate methods are used to implement the reductions for discretionary appropriations and direct spending.

¹ The reduction for FY 2013 was revised by the American Taxpayer Relief Act of 2012, as explained in the OMB Report to the Congress on the Joint Committee Sequestration for Fiscal Year 2013, available at http://www.whitehouse.gov/sites/default/files/omb/assets/legislative_reports/fy13ombjcsequestrationreport.pdf.

Discretionary Reductions. The base for allocating reductions to discretionary appropriations is the discretionary spending limit for FY 2014 set forth in section 251(c)(3). The reductions are implemented by lowering the discretionary spending limits for the revised security (defense) category and the revised nonsecurity (nondefense) category.

Direct Spending Reductions. Pursuant to paragraphs (5) and (6) of section 251A, and consistent with section 6 of the Statutory Pay-As-You-Go Act of 2010, the base for allocating reductions to budget accounts with direct spending is the sum of the direct spending outlays in the budget year and the subsequent year that would result from sequestrable budgetary resources in FY 2014.

Estimates of sequestrable budgetary resources and outlays for budget accounts with direct spending are equal to the current law baseline amounts contained in the President's FY 2014 Budget, and include direct spending unobligated balances in the defense function² and Federal administrative expenses that would otherwise be exempt³.

The majority of estimated direct spending unobligated balances in the defense function are in Department of Defense accounts. The Department of Defense estimates of unobligated balances as of October 1, 2013 are consistent with the estimates in the FY 2014 Budget.

For purposes of applying a sequestration under BBEDCA, "administrative expenses" for typical Government programs are defined as the object classes for personnel compensation, travel, transportation, communication, equipment, supplies, materials, and other services. For Government programs engaging in commercial, business-like activities, administrative expenses constitute overhead costs that are necessary to run a business, and not expenses that are directly tied to the production and delivery of goods or services.

The reductions to direct spending are implemented through sequestration of non-exempt budgetary resources. Pursuant to sections 251A(8), 255, and 256, most direct spending is exempt from sequestration or, in the case of the Medicare program and certain other health programs, is subject to a 2 percent limit on sequestration.

Defense Function Reduction

Steps 1 and 2 on Table 2 show the calculation of the reduction required for discretionary appropriations and direct spending within the defense function. Steps 3 and 4 on Table 2 reflect the implementation of the reductions calculated in steps 1 and 2 through an adjustment to the discretionary spending limit for the defense category and a sequestration of direct spending in the defense function.

The calculation of the reduction involves the following steps:

- Step 1. Pursuant to section 251A(5), the total reduction of \$54.667 billion is allocated proportionately between discretionary appropriations and direct spending. The total base is the sum of the FY 2014 discretionary spending limit for the defense category (\$552 billion) and OMB's baseline estimates of sequestrable direct spending outlays (\$7.673 billion) in the defense function in FY 2014 and FY 2015 from direct spending sequestrable resources in FY 2014. Discretionary appropriations comprise nearly 99 percent of the total base in the defense function.
- Step 2. Total defense function spending must be reduced by \$54.667 billion. As required by section 251A(5)(A), allocating the reduction based on the ratio of the discretion-

² Defense function unobligated balances are not exempt from sequestration pursuant to section 255(e) of BBEDCA.

³ Under sections 251A(8) and 256(h) of BBEDCA, Federal administrative expenses are subject to sequestration "without regard to any exemption, exception, limitation, or special rule that is otherwise applicable."

ary spending limit to the total base (the sum of the defense discretionary spending limit and sequestrable direct spending) yields a \$53.918 billion reduction required to be made to discretionary appropriations. Under section 251A(5)(B), the remaining \$0.749 billion is the reduction required for budget accounts with direct spending.

The implementation of the reductions involves the following steps:

- Step 3. As required by section 251A(7)(B), the discretionary spending limit for the defense category is lowered by the amount calculated in step 2, which results in a discretionary defense cap for FY 2014 of \$498.082 billion.
- Step 4. As required by section 251A(8), the percentage reduction for non-exempt direct spending is calculated by dividing the direct spending reduction amount (\$0.749 billion) by the sequestrable budgetary resources (\$7.673 billion) for budget accounts with direct spending, which yields a 9.8 percent sequestration for budget accounts with non-exempt direct spending.

Direct Discretionary Total Spending Calculation of Reduction: Step 1. Base for allocating reduction 552.000 7.673 559.673 Percentage allocation of reductions 98.63% 1.37% Step 2. Allocation of total reduction 53.918 0.749 54.667 Percentage allocation of reductions 98.63% 1.37% Implementation of Reduction: Step 3. Reduction in defense cap: Appropriations reduction required ... -53.918 Adjusted defense cap 498.082 Step 4. Sequestration percentages calculation: Sequestrable base 7.673

9.8%

Table 2. DEFENSE FUNCTION REDUCTION

(Dollars in billions)

Nondefense Function Reduction

Steps 1 through 3 on Table 3 show the calculation of the reduction required for discretionary appropriations and direct spending within all other functions besides 050 (nondefense function). The calculation is more complicated than the calculation for the defense function due to a two percent limit in the reduction of Medicare spending, a two percent limit in the reduction of community and migrant health centers, and a special rule for applying the reduction to student loans. Steps 4 and 5 on Table 3 reflect the implementation of the reductions calculated in steps 1 through 3 through an adjustment to the discretionary spending limit for the nondefense category and a sequestration of direct spending in the nondefense function.

The calculation of the reduction involves the following steps:

Sequestration percentage

Step 1. Total spending in the nondefense function must be reduced by \$54.667 billion. The portion of Medicare subject to the two percent limit is estimated to have combined FY 2014 and FY 2015 outlays of \$557.870 billion from FY 2014 budgetary resources, so a two percentage point reduction would reduce outlays by \$11.157 billion, leaving a

- reduction of \$43.510 billion to be taken from discretionary appropriations and other direct spending in the nondefense function.
- Step 2. Pursuant to section 251A(6), the remaining reduction of \$43.510 billion is allocated proportionately between discretionary appropriations and other direct spending in the nondefense function. The base (\$601.366 billion) is the sum of the FY 2014 discretionary spending limit for the nondefense category (\$506.000 billion) and the remaining sequestrable direct spending base (\$95.366 billion). The latter amount equals OMB's 2014 Budget baseline estimates of total sequestrable direct spending outlays in the nondefense function in FY 2014 and FY 2015 from direct spending sequestrable resources in FY 2014 (\$653.236 billion) minus the portion of Medicare subject to the two percent limit (\$557.870 billion). Discretionary appropriations account for 84.14 percent of the remaining base in the nondefense function, and direct spending accounts for 15.86 percent.

Applying these percentage allocations to the remaining required reduction for programs in the nondefense function yields the reduction for discretionary appropriations (\$36.609 billion) and for remaining direct spending (\$6.901 billion), following the procedures for allocating the sequestration contained in section 251A(6).

Step 3. The sequestration reduction for the mandatory portions of certain health programs is limited to two percent pursuant to sections 251A(8) and 256(e)(2). The portion of these programs subject to the two percent limit is estimated to have combined FY 2014 and FY 2015 outlays of \$1.242 billion from FY 2014 budgetary resources, so a two percent reduction would reduce outlays by \$0.025 billion. Deducting these savings from the non-Medicare direct spending reduction leaves \$6.876 billion to be taken by a uniform percentage reduction of the remaining sequestrable direct spending of \$94.124 billion in the nondefense function.

The implementation of the reductions involves the following steps:

- Step 4. As required by section 251A(7)(B), the discretionary spending limit for the nondefense category is lowered by the amount calculated in step 2, which results in a discretionary nondefense cap for FY 2014 of \$469.391 billion.
- Step 5. The remaining reduction (\$6.876 billion) to direct spending is applied as a uniform percentage reduction to the remaining budget accounts with sequestrable direct spending and by increasing student loan fees by the same uniform percentage, as specified in sections 251A(8) and 256(b). Each percentage point increase in the sequestration rate is estimated to result in \$0.017 billion of savings in the direct student loan program. Solving simultaneously for the percentage that would achieve the remaining reduction when applied to both the remaining sequestrable direct spending (\$94.124 billion) and to student loan fees yields a 7.2 percent reduction. This percentage reduction yields savings of \$0.122 billion in the direct student loan program and \$6.777 billion from the remaining budget accounts with non-exempt direct spending.

Table 3. NONDEFENSE FUNCTION REDUCTION

(Dollars in billions)

		Discretionary	Direct Spending	Total

^{*} Includes funding for community and migrant health centers, and for Indian health services.

Reductions to Discretionary Spending Limits

The reductions to the discretionary spending limits in both the defense and nondefense categories calculated in this report pursuant to section 251A of BBEDCA are reflected as adjustments to such limits in the OMB Discretionary Sequestration Preview Report, provided pursuant to section 254 of BBEDCA.

Direct Spending Reductions by Budget Account (Appendix)

The Appendix of this report sets forth the percentage and dollar amount of the reductions required for each budget account with sequestrable direct spending. Specifically, the Appendix shows the sequestrable budgetary resources in each budget account with direct spending, the percentage reduction required for each sequestrable budgetary resource, and the

resulting reduction. For illustrative purposes only, the Appendix shows the application of the same percentage reduction to each type of budgetary resource within a budget account with direct spending. There is no requirement that sequestration be applied equally to each type of budgetary resource within a budget account. Section 256(k)(2) of BBEDCA requires that sequestration be applied equally at the program, project, and activity level.

APPENDIX: DIRECT SPENDING SEQUESTRABLE BUDGETARY RESOURCES AND REDUCTIONS BY BUDGET ACCOUNT

(Fiscal year 2014; in millions of dollars)

Based on sections 251A, 255, and 256 of the Balanced Budget and Emergency Deficit Control Act of 1985 (BBEDCA), as amended

Percentages Used:

9.8 percent – Defense mandatory

7.2 percent – Nondefense mandatory

2.0 percent – Medicare program and certain health programs

For illustrative purposes only, the Appendix shows the application of the same percentage reduction to each type of budgetary resource within a budget account. Pursuant to section 256(k)(2) of the Balanced Budget and Emergency Deficit Control Act of 1985, the sequestration must be applied equally at the program, project, and activity level, but need not be applied equally to each type of budgetary resource within a budget account.

NOTES

Amounts may not sum to total due to rounding.

Mandatory Federal administrative expenses of otherwise exempt accounts are sequestrable pursuant to section 251A(8) and section 256(h) of BBEDCA.

Unobligated balances of budget authority carried over from prior fiscal years in defense function 050 accounts are sequestrable.

For intragovernmental payments, sequestration is applied to the paying account. The funds are generally exempt in the receiving account in accordance with section 255(g)(1)(A) of BBEDCA so that the same dollars are not sequestered twice.
