## Clean Face Masonry Design & Clean Burning

Our Clean Burning Grand Georgian models set new standards for wood burning quality, performance, beauty and perhaps most notably, scale. Available with standard refractory brick panels, they're the only manufactured fireplace that offers a true, masonry appearance, with enormous opening dimensions and a clean face design with no visible interior sheet metal... plus lots of other beautiful new features homeowners will love!

Georgians boast enormous opening dimensions and clean face masonry design with no visible smoke shelf or other steel components. Paneled units feature the industry's finest, most realistic textured refractory brick liner and a convenient ash dump in the hearth floor. Masonry models feature our very own Mosaic Masonry technology. Mosaic Masonry offers beautiful kiln-fired clay firebrick walls and are indistinguishable from site-built masonry.

Georgians come standard fully insulated and vent with our 12" double wall pipe for trouble free operation and maximum heat output in any climate or conditions. Homeowners may opt for an Fmi gas log set. All gas connections and controls will be hidden out of sight so you see only the beautiful flame, premium gas logs and ember bed.

Mosaic Masonry™ made simple. Firebrick walls are hand grouted in the factory for ease of installation.

PureFire Emission Control System

GCAT42A fireplace with warm red stacked refractory brick.
