Dear Office of Information and Regulatory Affairs Hunt:

The "OMB Draft Guidelines for the Conduct of Regulatory Analysis and the Format of Accounting Statements" determines that saving the life of an elderly person is worth less than saving the life of a younger person.

As an American citizen who is the grandchild/child/relative of a senior citizen, I find that devaluing an elderly person's life is unethical and unmoral.

The analysis proposes to devalue the life of a human over 70 to 2/3 that of the rest of the population and lowers the established EPA price tag of a human life from $6.1 million to $3.7 million.

Sincerely,

Janet L. Drake
