OMB Issues 2015 Release Date Schedule for Principal Federal Economic Indicators

WASHINGTON, D.C. — The Office of Management and Budget (OMB) today issued the Schedule of Release Dates for Principal Federal Economic Indicators for 2015. The schedule is available [here](#).

Principal Federal Economic Indicators are the major statistical series that describe the current condition of the economy. They are compiled, released, and periodically evaluated in accordance with procedures established in OMB Statistical Policy Directive No. 3.

Each agency that issues these economic indicators has provided OMB with its schedule of releases for the upcoming calendar year. If special, unforeseen circumstances make it necessary to change any scheduled release date after this consolidated schedule is issued, the agency must announce and explain the change as soon as it is known. Additionally, each release of a principal economic indicator will include an announcement of the date and time of the next release. The last release in the calendar year will provide a schedule for the next calendar year.

Each issuing agency can provide the specific release schedule for its indicators. They can be contacted at the following numbers:
